

Aryan Rawat

Python Backend Developer | Full Stack Developer

📞 +91-6378865094 | ✉️ rawtaryan691@email.com | 🌐 aryan-rawat | 🐙 aryanrawat2004

SUMMARY

Backend-focused **Python Backend Developer** with **1.5+ years of experience** building scalable **RESTful APIs** using **FastAPI** and **Node.js**. Experienced in developing **ERP systems** and **mobile-backed applications** using **React Native**. Skilled in **PostgreSQL, MySQL, MongoDB, JWT authentication**, and **API optimization**. Proficient in deploying production-ready applications on **AWS (EC2, S3)** with **CI/CD pipelines**.

EDUCATION

Lovely Professional University (LPU) Feb 2026 – Present
Master of Computer Applications (MCA), Online Mode Punjab, India

JECRC University Aug 2022 – Dec 2025
Bachelor of Computer Applications (BCA) | CGPA: 7.54/10 Jaipur, Rajasthan

MPS International School 2022
Senior Secondary (12th) | Percentage: 67.5% CBSE Board

MPS International School 2020
Secondary (10th) | Percentage: 72% CBSE Board

EXPERIENCE

Aerometric Technologies Pvt. Ltd. Apr 2025 – Dec 2025
Python Developer Intern Jaipur, Rajasthan

- Built and maintained scalable **REST APIs** using **FastAPI** for multiple backend services
- Designed and optimized **SQL schemas and queries**, improving API response time by up to **30%**
- Implemented secure **JWT-based authentication** with role-based access control for protected endpoints
- Integrated **PostgreSQL/MySQL** databases and handled data modeling for production use cases
- Collaborated with frontend and QA teams to test, debug, and deploy features on **AWS**

Mabicons Technosoft Pvt. Ltd. Jan 2026 – May 2026
Full Stack Developer (Backend & DevOps) Jaipur, Rajasthan

- Worked as a **full-time backend developer** on production systems for an HR-tech company, contributing to both internal **ERP platform** and client-facing applications
- Designed and built scalable **REST APIs** for the **Society Ji** application, supporting real-world users and core features like user management, billing, and notifications
- Actively contributed to the development and enhancement of the company's **ERP system**, building backend modules for business workflows and operational management
- Managed **end-to-end backend development lifecycle** including API design, database schema design, integration, and performance optimization
- Performed **data analysis and reporting** to support internal operations and decision-making processes
- Handled **DevOps responsibilities**: deployed services on AWS, configured servers, monitored application performance, and managed environments
- Collaborated with cross-functional teams (frontend, mobile, and business teams) to deliver and maintain production-ready features
- Contributed to publishing, updating, and maintaining mobile applications on **Play Store & App Store**

PROJECTS

Society Ji Smart Society Management Application | [Play Store](#) | [App Store](#) | [Backend](#)

- Designed and implemented scalable backend services using **FastAPI** for a real-world **society management application**
- Built core modules including **user management, billing, notifications, and role-based access control (RBAC)**
- Built and optimized **REST APIs** with efficient database queries using **PostgreSQL/MySQL**
- Deployed and maintained backend on **AWS**, ensuring high availability, performance, and scalability

Mabicons ERP System | [Live API](#)

- Designed and implemented backend services using **Node.js** and **Express.js** for an internal **ERP system**
- Built scalable **REST APIs** to support core business workflows including employee management, reporting, and operations
- Integrated and managed **MongoDB/PostgreSQL** databases with optimized queries and efficient data modeling
- Handled backend architecture including routing, middleware, and modular service structure
- Deployed and maintained services on **AWS EC2**, with monitoring and environment configuration
- Collaborated with cross-functional teams to deliver and maintain production-ready features

E-Grocery Management API

- Delivered scalable backend using **FastAPI** with **PostgreSQL** for grocery operations
- Implemented modules for **employees, stores, categories, and services** with optimized SQL queries
- Integrated **JWT authentication**, **AWS S3** for file handling, and modular project architecture
- Collaborated in a **4-member Agile team** using **GitHub** for version control

E-Clinix – Online Medical Platform

- Built backend APIs using **FastAPI**, **SQLAlchemy**, and **PostgreSQL**
- Engineered endpoints for **patients, doctors, and appointments** with secure **JWT authentication**
- Integrated **Google Meet API** for online consultations and supported deployment on AWS

Bottom Work Node API | [Live API](#)

- Delivered backend using **Node.js** and **Express.js** for core business workflows
- Implemented secure **authentication** and **role-based access control (RBAC)** with RESTful endpoints
- Integrated **MongoDB/PostgreSQL** with optimized queries for efficient data handling
- Deployed on **AWS EC2** with **CI/CD pipelines** for automated build, testing, and deployment

CERTIFICATIONS & ACHIEVEMENTS

Data Analysis Using Python

R Programming

Statistics Using Python

TCS CodeVita – Season 12

SKILLS

Languages: Python, JavaScript, SQL

Frameworks: FastAPI, Flask, Node.js (Express.js), React Native

Databases: PostgreSQL, MySQL, MongoDB, SQLite

Cloud & DevOps: AWS (EC2, S3), CI/CD, Linux

Core Concepts: RESTful APIs, Microservices, System Design, JWT Authentication, RBAC, API Design, Database Optimization

Tools: Git, GitHub, Bitbucket, Postman
